smart radiator valves

37%

less energy to heat your home

Energy savings of 37%*

- The Valves set a schedule aligned with your daily routine, to heat only where and when you need it.
- Open Window Detection: effectively avoid energy waste.
- Track your energy consumption day to day and schedule your heating more effectively.

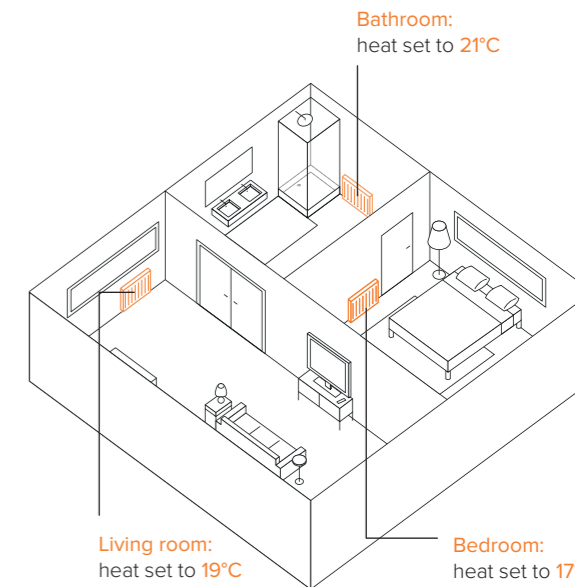

Room-by-room comfort

- Fine-tune your comfort temperature room by room.
- Smart Regulation: the Valves analyse the room environment in real time and adjust heating according to sunshine level and room use.
- Manual Boost: temporarily raise the temperature in a specific room.

Remote control dashboard

- Control your heating remotely from anywhere in the world.
- Control all your radiators using just one smartphone app.
- Schedule your heating for when you return from holiday.

*Source: JSS, Centrale-Supélec School of Engineering study on a traditional flat fully equipped with Netatmo Smart Radiator Valves.

In the morning, users choose the Comfort + mode. They heat the bathroom at 21°C, the living room at 19°C and the bedroom at 17°C.

Voice control

Control your heating with your voice simply using Siri on iPhone/iPad or Alexa on Amazon Echo.

Specifications

Product description

Thermostatic valve with smart operation.
Designed by Starck.
Option to customise in 1 of 4 available colours.
UV-resistant translucent plexiglas cylinder.
E-Paper display: energy efficient and optimum readability.
Option to adjust the temperature directly on the Valves.
2-year battery life.
Valve size: 80x58 mm.

Relay

Acts as a relay between the Valves and the Wi-Fi router.
Size: 83x83x24 mm.

Sensors and measurements

Temperature (measurements):
Range: 0°C to 50°C
Accuracy: +- 0,5°C
Temperature (setpoint):
Setpoint range: 5°C à 30°C
Measurement increment:
0.5°C
Units: °C

Application

No subscription fees.
Accessible from multiple devices.
Secure connection.

Wireless specifications

Encrypted communication protocol. Compatible with Wi-Fi 802.11 b/g/n (2.4GHz).
Supported security: Open//WEP/WPA/WPA2-personal (TKIP et AES).
Wireless connection between the Valve and Relay:
100m long-range radio.

Application Compatibility

iOS 9 minimum required
Android 4.2 minimum required.

Hardware requirements

Wi-Fi router and internet access.
Public hotspots not supported.
